NexaSecure Tech

WEEK 2 INTERNSHIP REPORT

Cybersecurity Foundations & Lab Environment

Intern Name: Maheen Rizwan

Internship Field: Ethical Hacking

Organization: NexaSecure Tech

Reference ID: NST-2026-11176

Internship Mode: Remote / Task-Based

Week: Week 2

Submission Date: March 21, 2026

Objective:-

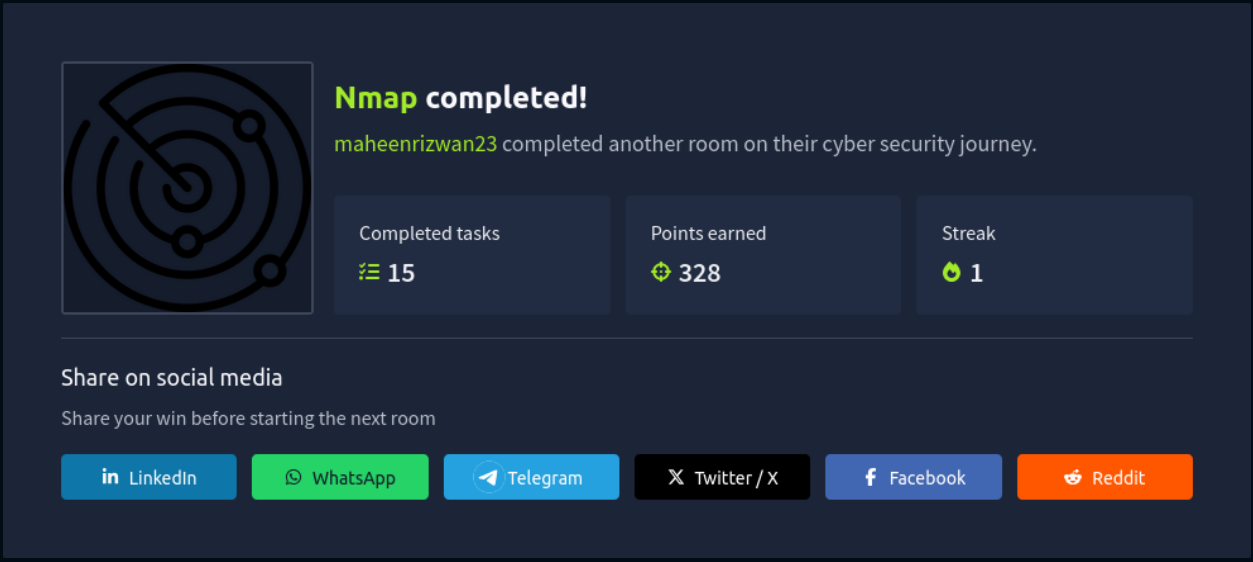
The objective of this week was to perform reconnaissance and scanning to gather information about target systems, identify open ports, running services, and potential vulnerabilities using various cybersecurity tools.

Tools Used:-

- Nmap
- Wireshark
- theHarvester
- Whois Lookup Tools
- TryHackMe
- Hack The Box

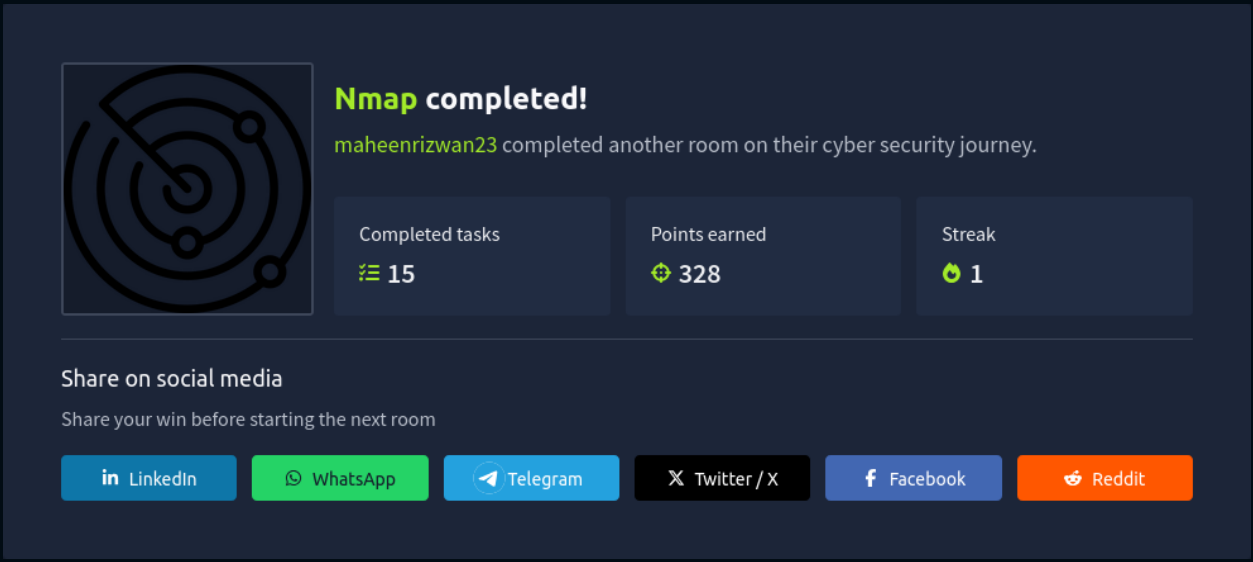
Daily Activities:-

Day 8: Nmap Basics:-



Outcome: Identified live hosts, learned basic scanning techniques

Day 9 and 10 :Advanced Nmap Scanning



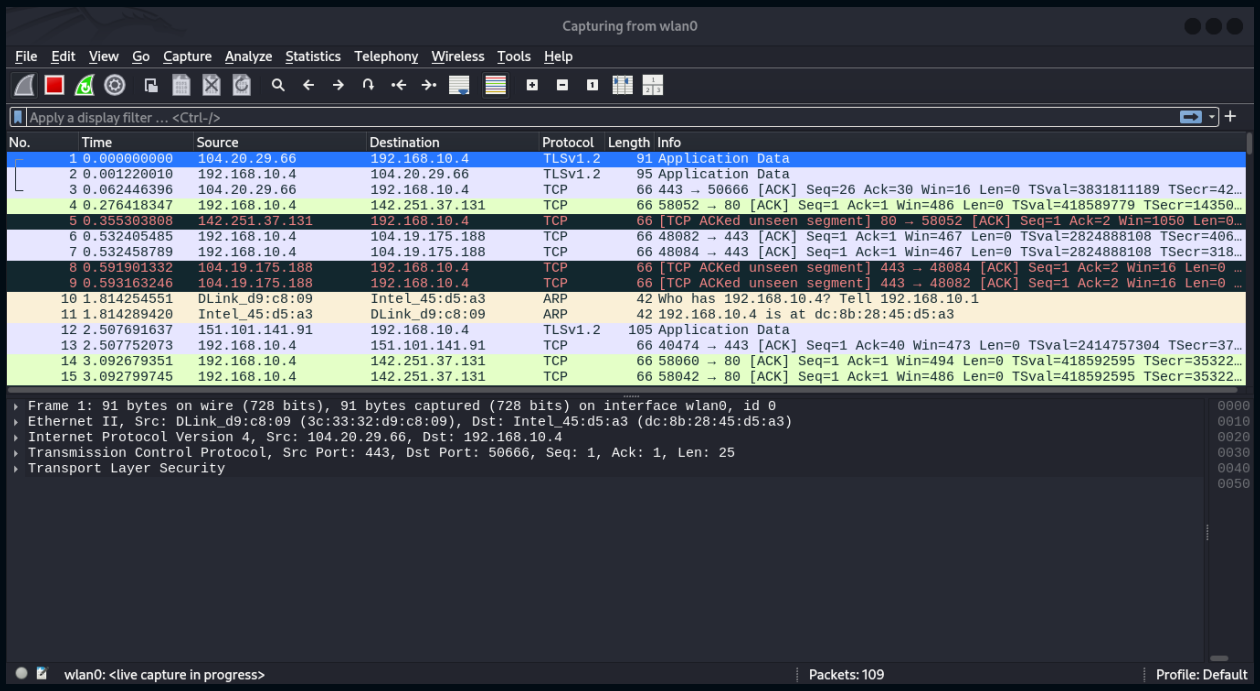
Outcome: -

Performed stealth scanning, detected operating system and services

Day 11: Packet Analysis using Wireshark:-

Activities:-

Captured packets, applied filters (HTTP, DNS, TCP), inspected packet details.



Outcome: -Understood packet flow, learned traffic analysis

Day 12: Subdomain & Email Harvesting:-

Using theHarvester:-

- theHarvester -d tryhackme.com -b bing
- theHarvester -d tryhackme.com -b yahoo
- theHarvester -d tryhackme.com -b crtsh

Findings: - Subdomains: help.tryhackme.com, business.tryhackme.com, careers.tryhackme.com,store.tryhackme.com

- Email: support@tryhackme.com

- 79+ subdomains found using CRT.sh Challenges: Some sources required API keys, network errors occurr

Key Learnings:-

- Importance of reconnaissance in penetration testing

- Network scanning techniques
- Identifying system vulnerabilities
- Packet analysis and monitoring
- Ethical hacking best practices

Conclusion:-

This week provided practical experience in reconnaissance and scanning. Tools like Nmap, Wireshark, and theHarvester were used to gather information and identify vulnerabilities, highlighting the importance of securing systems.
